Armament Shop

Or

Tell us what you need and we'll design it

**We can configure other types of
containers also; ISU 90...**

Modular Equipment Storage

Modular Equipment Storage Containers are capable of accommodating a wide range of equipment.

The modular racking system was designed with flexibility in mind.

Racks can be quickly adjusted for easy positioning of different equipment sizes.

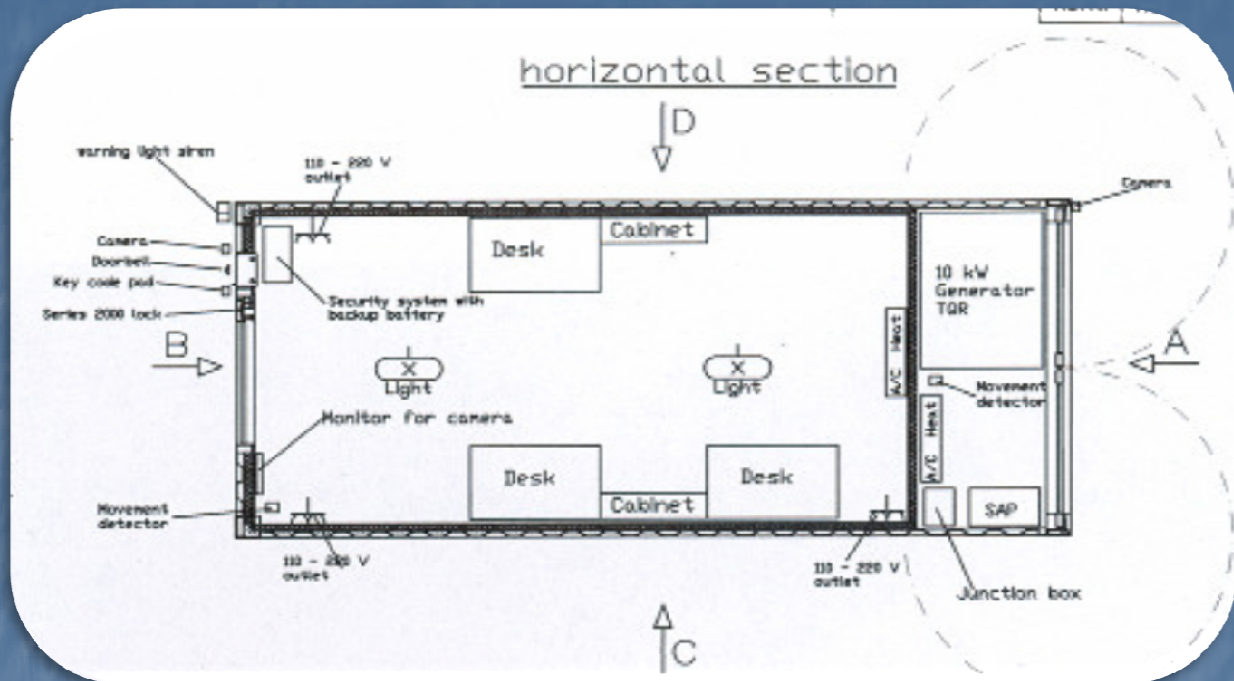

Structural interior with load bearing struts that hold up to 600 kg per.

GPS Tracking Unit available upon request.

Modular Equipment Storage

Communications Suite

A/C Unit with Heater internally mounted

220V and 110V outlets , overhead lighting and cabinets

10kw (TQG) generator and junction boxes internally mounted and securable

Walls are insulated and panelled inside, folding tables mounted on the walls

Intrusion Detection System with a touchtone keypad, sirens and flashing lights, interior motion sensors and an inside control panel. External power source connection and solar panels to support the container back-up battery, so the IDS can be maintained in the absence of a main power source.

GPS Tracking Unit available upon request.

10kw (TQG) generator
Diesel Powered

Heating & A/C Units
